Trymox LA & RedyMox

Your Complete Amoxicillin Range

Forte Healthcare's Amoxicillin injectables provide targeted, effective treatment for a wide range of infections in cattle, sheep, pigs, dogs and cats.

Since 2020 Forte Healthcare have proudly and reliably supplied **Trymox LA**, ensuring consistent availability and dependable service. We are now excited to introduce **RedyMox**, its complementary short-acting partner, brought to you with the same commitment to continuity of supply and trusted quality.

Both **Trymox LA** and **RedyMox** contain amoxicillin 150 mg/mL as a suspension for injection, presented in 100 mL bottles. As a Category D antibiotic (EMA), amoxicillin is recommended for first-line use to support responsible prescribing and antimicrobial stewardship.

Why choose Trymox LA?

- ✓ Long-acting, single-dose convenience with up to 48-hour duration
- ✓ Can repeat dose after 48 hours
- ✓ For the treatment of infections of the alimentary tract, respiratory tract, urogenital tract, skin and soft tissue caused by bacteria susceptible to amoxicillin.
- ✓ Excellent syringeability
- ✓ Easy resuspension

WITHDRAWAL TIMES

Cattle	39 days (meat and offal), 108 h (milk)
Sheep	29 days (meat and offal), not authorised for milk
Pigs	42 days (meat and offal)

Why choose RedyMox?

- ✓ Short-acting formulation rapidly achieves therapeutic concentrations
- ✓ Suitable for once daily dosing for up to 5 days
- ✓ For the treatment of infections caused by a wide range of Gram-positive and Gram-negative pathogenic bacteria including: *Actinobacillus equuli*, *Actinomyces bovis*, *Actinobacillus lignieresii*, *Bacillus anthracis*, *Erysipelothrix rhusiopathiae*, *Bordetella bronchiseptica*, *Escherichia coli*, *Clostridium* species, *Haemophilus* species, *Corynebacterium* species, *Pasteurella* species, *Fusiformis* species, *Proteus mirabilis*, *Moraxella* species, *Salmonella* species, *Staphylococci*, *Streptococci*
